

A smarter way to work.

Jobmate Monitor Stand makes it comfortable to work in front of a screen. Having the screen positioned at eye-level prevents stiffness and pain as you don't need to work with your neck bent forward. The stand can be adjusted to two different heights. For improved ergonomics, consider using a separate keyboard if you work at a laptop. Suitable for both laptop computers and screens.

With Jobmate Monitor Stand:

- Avoid pain and stiffness in the neck.
- You can work with the screen at the right height.
- Create space on your desk.
