

StandUp Active

Balance Ball / Balance Ball Free

StandUp Active Balance Ball / Balance Ball Free

Part of our Active product range. Makes it easy to stay active, mobile and healthy all day long.

StandUp Active Balance Ball has an attractive, ergonomic design for active sitting. When you sit on a balance ball, you stimulate your stomach, flank and back muscles and strengthen your trunk. It promotes a better posture and improves circulation. Use our balance ball as a complement to your active lifestyle and switch between balancing, sitting and standing. StandUp Active Balance Ball is made from soft, durable Alcala fabric. The sewn-in base ring makes sure the ball stays put when not in use. A handle makes it easy to move around. Internally inflatable ball, pump supplied. There's an eyelet for hanging up the ball when it's not in use.

StandUp Balance Ball Free, is our PVC-free alternative.
